

## What is Connections P2P™?

ConnectionsP2P™ is our tool to help you make connections on a People to People basis. It allows the sharing and gathering of information. There is a growing view that the term networking has negative connotations: that it's a corporate cliché and sounds like 'hard work'.

When looking for advancement in your career or professional / personal development, you need to utilise every method possible to identify potential sources of information.

At hranywhere we chose to describe networking as **Connections P2P™** (People to People).

We provide you with a fresh look at the tools and processes to identify and build your own Connections which opens up more doors for you in your search for development, personal and professional growth and career advancement.

## Why is it important?

It's the old saying that goes "it's not what you know, it's who you know" that often rings true throughout your career journey. With research showing that 70% of all positions are secured through the aid of Connections, it's worth finding out how to get the most out of your potential contacts.

Connections P2P™ provides a systematic approach to identifying and developing known contacts amongst various groups for example: family, friends, work colleagues, community and sporting groups and assists you to develop an action plan on how to best make Connections.

The advantage of building your Connections is that, you will be promoted by people who **know you** and **know what you do**. Referrals are the best way of being recommended.

## hranywhere Connections P2P™ offer
