

Why is it important?

Growth of a business also requires growth of its people. The acquisition of knowledge skills and behaviours that improve an employee’s ability to meet changes in a business are key factors in meeting business objectives and allowing organisations to stay competitive.

Up skilling employees and advancement planning provides a business with capable and competent talent to take a business to ‘the next level’ of performance success, deliver new targets and objectives, to be responsive to the introduction of new processes and technology and competent to manage growing teams.
